Professional Summary

Backend Software Engineer with 2+ years of experience developing scalable web applications, CRM systems, and RESTful APIs using PHP, Laravel, and MySQL. Strong experience in backend architecture, SQL database design and optimization, authentication, role-based access control (RBAC), API integrations, webhooks, and automated workflows. Experienced in end-to-end feature development, production deployment, troubleshooting, and technical project supervision.

Technical Skills

Languages: PHP, JavaScript, TypeScript, SQL
Frameworks: Laravel, CodeIgniter, Astro
Backend: RESTful APIs, MVC, OOP, Authentication, RBAC, Webhooks, Cron Jobs, API Integration
Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS
Database: MySQL, MariaDB, MongoDB, SQL, Query Optimization, Database Design
DevOps: Linux, Docker, Nginx, Apache, DigitalOcean, CI/CD
Tools: Git, GitHub, Composer, Postman

Experience

PHP Developer 2024 – Present
XpertConsortium Technologies LLP

- Develop and maintain backend applications, CRM systems, and RESTful APIs using PHP, Laravel, MySQL, MVC, and object-oriented programming.
- Design and optimize SQL databases, queries, and backend workflows for reliable application performance and scalable data management.
- Implement authentication, role-based access control (RBAC), webhooks, Cron Jobs, and reusable backend services for business workflows.
- Integrate third-party APIs and services including Razorpay, Google Maps, WhatsApp API, SMS DLT, video platforms, and payment services.
- Develop features from requirements through testing and production deployment using Git, GitHub, Composer, Linux servers, and Postman.
- Supervise project development, coordinate technical implementation, review requirements, and troubleshoot production issues.

Projects

JJ Solar – Field Management System | *PHP, MySQL, REST APIs*

- Developed a CRM and field management system for customers, solar installations, service jobs, technicians, assignments, work reports, and service workflows with RBAC.
- Developed RESTful APIs for mobile applications and handled database design, authentication, job workflows, reporting, and technical project supervision.

Squarefit – E-commerce & Appointment System | *PHP, MySQL*

- Developed e-commerce, appointment, payment, and booking workflows with Razorpay, Google Maps, WhatsApp API, and SMS DLT integrations.

Thinc Design – Learning Platform | *Core PHP, REST APIs*

- Developed backend APIs and integrated TPStream, Zoom, and TestPress for live classes, video streaming, and online examinations.

Elance Learning Platform | *PHP, REST APIs*

- Migrated video infrastructure from Vimeo to TPStream and developed backend API integrations for video delivery and learning workflows.

Education

Govt. Engineering College Wayanad
Bachelor of Technology (B.Tech) in Computer Science and Engineering *2020 – 2024*
